

Senior Java Developer – Boca Raton, Florida

Interested in joining a team that is changing how mobile phones will be used, now and in the future? Sensei Inc. is looking for seasoned, senior java developers to join us on our mission! As Steve Jobs once said, “Do you want to sell sugar water for the rest of your life, or do you want to come with me to change the world”, we are looking for talented individuals who want to change the world.

Sensei has designed and built a unique healthcare IT platform that leverages mobile devices to deliver innovative applications and services to our consumers and our enterprise customers. Using a service-oriented architecture, open source technologies, and Java as our base development language, our team has built and deployed an innovative and award winning approach to mHealth.

Sensei, started in 2005, is a leading mHealth company creating innovative solutions for health and health benefits focused on improving outcomes and lowering costs. Sensei’s solutions are based on our extensive experience in population health, mobility and telemedicine. Sensei’s solutions engage and empower people to live healthier lives, providing actionable insights at teachable moments. Leveraging new approaches to consumer engagement (i.e. monitoring, tracking, feedback, incentive and rewards), we make technology personal, integrating information systems and wireless technology. Sensei solutions address the needs of the disparate stakeholders in healthcare, consumers, health plans, employer’s, ACO’s and other health related organizations.

We are looking for creative, entrepreneurial individuals with a get up, go, and get it done attitude. Being able to successfully implement the design and implementation of large-scale enterprise grade platforms is essential for success in this role. Overall, the senior java developer will work as a member of a cohesive and collaborative team involved in detailed design, development and testing of key components and infrastructure using the Agile methodology.

Qualified individuals will have:

- 5+ years experience designing and developing complex, distributed systems
- 4+ years experience as a software developer in Java (J2EE) based environments
- 3+ years experience with complex open source development environments
- Proficient in object-oriented design, implementation, and documentation (UML)
- Experience with Java technologies such as Spring, JSF, Hibernate
- Experience with user interface frameworks like RichFaces, MyFaces, or Seam
- Experience with SOAP, XML, SOA, ESB
- Knowledge and experience of relational databases and SQL, preferably MySQL
- Knowledge and experience working in application server environment, preferably JBoss
- Knowledge and experience with open source tools like Alfresco, Pentaho, Drupal, and Word Press a plus
- Knowledge and experience with mobile application development a plus (JME, Android, iOS, BREW)
- BS Computer Science or equivalent work experience
- Fluent written and spoken English, along with strong verbal communication skills
- Demonstrated ability to multi-task and work in complex environments
- Strong team player with proven Java development skills and strong knowledge of service oriented architectures with experience in fast paced, Agile, distributed, team-oriented, project environments

If this sounds like you, we’d love to talk! Sensei offers competitive compensation, an outstanding benefit package, and an excellent work environment in South Florida. Please email your resume to careers@sensei.com.
